

Performance Summary

United States Department of the Navy

Project Name: Navy Voting Information Management System (VIMS)

Contract Number: HDQMWR-10-C-0023

Technologies Used: Microsoft ASP.NET 4.0, ASP.NET MVC, SQL Server

Project summary

- VIMS (Voting Information Management System Portal) is the current system employed by the United States Navy Fleet and Family Readiness Unit for managing voting paperwork/compliance requirements on all Naval Destroyers/Carriers abroad. The system employs a SQL back-end database which we designed, developed, and implemented based on contract specs as well as using existing Excel spreadsheet/macros and concept drawings that the Navy provided. ASP.NET front-end integration/design with full system security.

United States Department of the Interior Office of Surface Mining, Reclamation and Enforcement

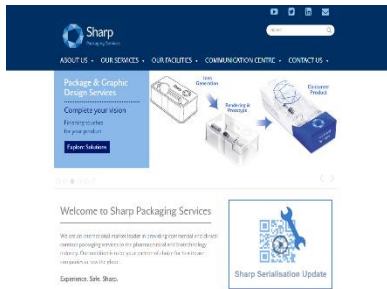

Project Name: Technical Innovation and Professional Services (TIPS) Web Site System / Database

Order Number: S12PX00173

Technologies Used: Microsoft ASP.NET 4.0, ASP.NET MVC, SQL Server

Project summary

- TIPS is the Technical Innovation and Professional Services, a national service provided by the U.S. Office of Surface Mining Reclamation and Enforcement, that provides off-the-shelf scientific and engineering modeling software to the state, tribal, and federal offices that administer the Surface Mining Control and Reclamation Act of 1977. Using their existing web site content as a starting point, we worked directly with their team and specs to develop a full-scale web site/CMS system using a SQL back-end database and ASP.NET front end. We also provided system training based on contract specs and remote technical assistance in site launch and system implementation in their hosting environment.

Sharp Services
