Performance Summary

United States Department of the Navy

Project Name: Navy Voting Information Management System (VIMS)

Contract Number: HDQMWR-10-C-0023
Tech Stack: Microsoft ASP.NET 4.0, ASP.NET MVC, SQL Server
Project Management: Scrum/Agile Methodology

Project summary

- VIMS (Voting Information Management System Portal) is the current system employed by the United States Navy Fleet and Family Readiness Unit for managing voting paperwork/compliance requirements on all Naval Destroyers/Carriers abroad. The system employs a SQL back-end database which we designed, developed, and implemented based on contract specs as well as using existing Excel spreadsheet/macros and concept drawings that the Navy provided. Scrum Agile Project Methodology was employed for the project management process, with ASP.NET & MSFT SQL Server.

**United States Department of the Interior
Office of Surface Mining, Reclamation and Enforcement**

Project Name: Technical Innovation and Professional Services (TIPS) Web Site System / Database

Order Number: S12PX00173
Tech Stack: Microsoft ASP.NET 4.0, ASP.NET MVC, SQL Server.
Project Management: Scrum/Agile Methodology

Project summary

- TIPS is the Technical Innovation and Professional Services, a national service provided by the U.S. Office of Surface Mining Reclamation and Enforcement, that provides off-the-shelf scientific and engineering modeling software to the state, tribal, and federal offices that administer the Surface Mining Control and Reclamation Act of 1977. Using their existing web site content as a starting point, we collaborated with OSM team leads and stakeholders using an Agile project management methodology to develop a full-scale web site/CMS system using Microsoft ASP.NET 4.0, ASP.NET MVC, and SQL Server. We also provided system training based on contract specs and remote technical assistance in site launch and system implementation in their hosting environment.

Administration for Native Americans Eastern Region
